## **Layered Security Model**

The screenshot shows a software interface for managing authentication servers. At the top, there's a navigation bar with tabs: 'List of Servers' (selected), 'New Server', 'Mapping Rules', 'Auth Test', and 'Accounting'. Below the navigation bar, there's a search bar with placeholder text 'Search...'. The main area has a title 'User Management > Auth Servers'. A dropdown menu labeled 'Authentication Type' is open, showing options: 'Kerberos' (selected), 'Kerberos', 'Radius', 'Windows NT', 'DAP', 'Smb', 'Transparent 802.1x', 'Transparent Windows', and 'Allow All'. To the right of the dropdown, there are two input fields: 'Provider' with a placeholder 'Provider' and 'Default Role' with a dropdown menu showing 'Unauthenticated Role' (selected). At the bottom, there are two buttons: 'Add Server' and 'Cancel'.

# AS No & Prefixes

### AS No and Prefixes

From this page select the prefixes and convert it to zones. Click add button to create new zone. Click update button to update already existing zone. Click delete button to remove the zone items from the zone list.

**AS No & Prefixes**

# New IP Prefixes	# Deleted IP Prefixes	# Updated IP Prefixes
<input style="width: 100%;" type="button" value="Import from prefix file"/>	<input style="width: 100%;" type="button" value="Add"/>	<input style="width: 100%;" type="button" value="Update"/>
<input style="width: 100%;" type="button" value="Delete"/>	<input style="width: 100%;" type="button" value="Ok"/>	<input style="width: 100%;" type="button" value="Cancel"/>

**SCE IP Addresses**

One or more SCE IP addresses must be specified

Configuring the SCE platforms requires that they are first added to the Network Navigator.

To add SCE platforms to the Network Navigator, type their IP addresses in the text box below (For example: 10.56.216.37, 10.56.216.38):

< Back    Next >    Finish    Cancel

The screenshot shows a network management interface for a Clean Access Server. The top navigation bar includes links for Status, Network, Filter, Advanced, Authentication, and Misc. Below this, a sub-navigation bar lists IP, DHCP (highlighted in yellow), DNS, Certs, IPsec, L2TP, PPTP, and PPP. The main content area has tabs for DHCP Status, Subnet List, Reserved IPs, Auto-Generate, and Global Options. A dropdown menu labeled 'DHCP Server' is open, showing 'Select DHCP Type and Reboot Clean Access Server'. Below this are sections for VLAN (254), Dynamic IPs (253), Available IPs (0), Static IPs, and View MACs (with a magnifying glass icon). At the bottom, there are two 'Show' buttons: 'Show DHCP Server Startup Message' and 'Show DHCP Configuration File'.

The Mne Licensee has always offered 24/7 support and the complete set of SM resources. Its use of the systems manager is governed by our final customer contract. To continue the 30 -day test, please contact Meraki Sales to buy corporate licensing or apply an evaluation request for the organization. Notwithstanding the customer's final contract, Cisco Meraki can end the free program 100 at any time, including the management of AT © 100 devices at no cost - but if we do it, we will give it a war warning. For the Legacy and SM Free 100 systems manager, licenses can be purchased by device. If the number of registered devices is equal to the licensed limit, no additional device may be registered in the network to be added or an existing device is not controlled. It will not be possible to log in to this prompt, as the device may be inscribed as soon as the licensing is disposed and in accordance. Resources include the following and future versions: All Nâ f o-shaped mode platforms and scheduled updates disable application installations and defining changes through SM during the CRONIC SCHEDULE OF INSTALLED BEMPACY AND Automatically update profiles only time time from Windows Software Upload files at © 3GBs to Meraki Cloud and distributes them to all your devices to iOS, macos and windows corporate packages, add scripts and custom expressions to your software pushed for your devices, for example. After the installation, run a script that consumes a license for the Microsoft Office insurance policies audit all devices and applies controversy for: Black applications mandatory applications in execution Mother Applications cellular system data cellular data security security for monthly use to single data limits u multiple use policies to take action measures in action in action the devices that analyze the data limit restrict changes in data roaming, personal access point and data oo to the final orary of the self-service portal of the final orary apps to perform mdm basic management and applicationTasks on your devices enrolled in the Provisional Systems Manager of Dynamic Devices Activate or revoke access to the network, email or applications / data based on the identity of the device (for example, insurance posture, geolocalization The black list of application, AD login, etc.) applications and scope profiles based on device ownership, Apple Classroom or group tags inscription and authentication of the user Rio Integration of the direct directive of the ad - authenticating google, Azure, Oauth Multi -USER Authentications - dynamically altering the device software and configurations based on authenticion EMAIL EMAIL Based on the Customer Certificate of the User Import and Implement Exchange or Office365 Certificates to limit corporate email access to managed devices. Automatically manage configuration and mark -marking updates Remove and clean devices (for example, offboarding) Cisco Identity Services Engine (ISE) Network POLICAL MANAGEM Limited access to create granular functions, personalized functions using tags, for example, teachers just see their classroom iPads and health during specific times, for example, the active management team. This will be displayed to the tests automatically remove 30 days after expiration. These licenses are labeled as 'SM-TRIAL'. Upon Licensed Unsuraries No other Cisco Meraki equipment is not eligible for free and email support, however, our documentation and Fan. that of problems. If you don't have a dispatched licenses or your account is not out of compliance, you may see a login prompt when trying to register a client device ikareM ikareM ocsiC sametsiS (SM) offers a full, Enterprise Mobility Management (EMM) solution, which includesÂ ÁMobile Device Management (MDM), Mobile Application Management (MAM), Mobile Content Management (MCM), and Mobile Identity (MI). There are two different trial types: Meraki-generated trial licenses, and customer-initiated trial licenses. These Legacy SM networks can be used to manage any number of devices without licensing, but with a limited feature-set and no support. Prior to 3/12/2015, Systems Manager was available as aÃ ÁfreeÃ ÁversionÃ Áin addition to licensed SM. Please contact your Cisco Meraki rep if you have any questions. The latter is a 30-day trial automatically applied when creating aÃ ÁnewÃ ÁDashboard organization, or by upgrading a Legacy network,Ã Áas shown below, and cannot be ended early or extended. Applying Enterprise license willÃ ÁoverrideÃ ÁLegacy and Free 100 status, not add on top of it. SM licensing operates on the same co-termination model as other Cisco MerakiÃ Áproducts, so it is subject to the same best practices and limitations. SM without licensing includes Systems Manager Legacy and the SM Free 100 program. 24/7 phone supportÃ Áfor SM networks is included with Systems Manager licensing. Upon expiration, Legacy customers who initiated the trial will automatically return to their Legacy state. Systems Manager Legacy networks have

employer as and if required. The recipient is responsible for taxes and duties, if any. This article outlines how SM licensing works, how older (legacy) SM networks work, and how to upgrade older networks to the current licensing model. To obtain a and/or purchase licensing, contact a Meraki representative for more information. For more information, see the blog post here or contact your Meraki sales representative. Potential customers can manage 100 devices to try Meraki Systems Manager (the "SM Free 100") at no cost. Customize the original text of the lock screen by device for easy identification. iOS 9.3 functionality Home Screen Layout Safari autofill domains Lost mode Notification settings Education Classroom Application Show/hide apps: blacklist app and white list Added restrictions (e.g., allowing changes to notifications, allowing Apple Music) iOS 9 feature Installing OS updates available Keep the device name updated Attribution of the VPP device - no longer needs Apple Locke Agent since the SM profile is installed Android for Work (Android Enterprise) Support for institution proprietary device mode and BYOD work profile modes Encrypted, native mobile container data profile Multi-app kiosk mode for deployments COSU (Corporate-Owned Single Use) Quiet app installs, managed Play Store, whitelist allowed apps Integration with your organization's domain Kiosk mode.
